

### TRANSMATIC MP

#### PRODUCT DESCRIPTION

Transmatic MP is a high-performance, high-quality multi-vehicle automatic transmission fluid formulated for Slip controlled lock-up clutch transmissions. Transmatic MP meets the requirements of a wide range of Automatic Transmission Specifications requiring Hyundai SP-III, SP-IV, GM DEXRON® III, Ford MERCON®, Toyota T-IV and WS. The product is suitable for use in OEM European transmissions requiring Volvo CE 97340, MB, BMW, VW, and ZF 4, 5, 6 and 8-speed automatic transmissions. Transmatic MP is a special blend of high-quality base stocks with advanced additives providing excellent anti-oxidation and thermal stability.

#### APPLICATIONS & BENEFITS

- Excellent anti shudder protection.
- Oxidation and thermal stability
- Provides high foam stability.
- Provides good operation in cold climates thanks to its excellent low-temperature fluidity.
- Reduced frictional properties protects transmission components.
- Use for most 4~8 speed vehicles.

#### PACK SIZES AVAILABLE

1L - 5L - 20L - 200L

#### SPECIFICATIONS

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### TYPICAL CHARACTERISTICS

| TRANSMATIC MP        | UNITS       | VALUES |
|----------------------|-------------|--------|
| VISCOSITY            | cSt @ 40°C  | 35.6   |
|                      | cSt @ 100°C | 7      |
| SPECIFIC GRAVITY     | @ 15°C      | 0.845  |
| VISCOSITY INDEX      | cSt         | 162    |
| POUR POINT           | °C          | -49    |
| FLASH POINT          | °C          | 220    |
| BROOKFIELD VISCOSITY | cP @ -40°C  | 14960  |

### ADDITIONAL INFORMATION

Designed for New Zealand Conditions | Manufactured from virgin base stocks. For more technical information please contact Vertex Lubricants NZ Technical Dept. +64 9 640 0004. Sheet updated 27 June 2023.
